## Resin Bonded Surfacing System From Addagrip Terraco Ltd

**NEW  
IMPROVED  
INSTALLATION  
PROCESS**

Providing the  
look of loose gravel  
without the  
maintenance  
issues

Experts in Resin Since 1980

# addastone<sup>®</sup> plus

The Addastone Plus Resin Bonded system provides an attractive, hard wearing, anti-slip surface by bonding loose gravel to asphalt, concrete, wood or metal.

Aggregates bonded in this way give the appearance of loose gravel without the maintenance issues of migrating stone.

A wide selection of aggregates is available to give a natural looking paving for heritage sites, landscaping schemes, historic visitor attractions and projects requiring a traditional loose gravel look

## New improved installation method

The new improved Addastone Plus installation process does not need a sealer or primer when applied onto a dense asphalt surface offering a faster and more cost effective installation. Surface preparation using vacuum assisted shot blasting provides improved adhesion (the ideal minimum area to be treated is 200 sqm). Priming of Concrete, timber or Steel surfaces will be required.

## Resin Bonded Surfacing

**Note: Resin Bonded Surfacing is not porous or SuDS compliant**

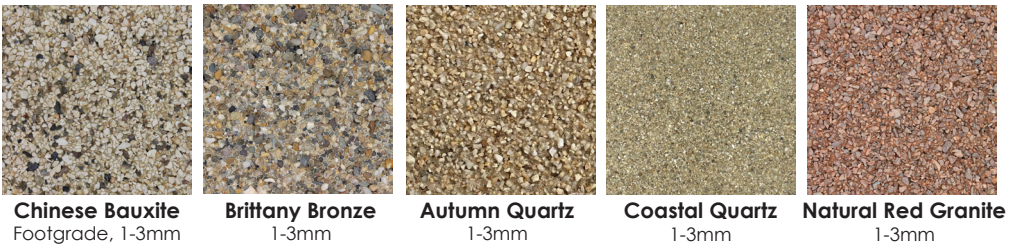

## For pedestrian and vehicle traffic **addastone<sup>®</sup> plus**

**Suitable for Pathways, Patios, Courtyards, Driveways, Car Parks, Access Roads**
